

Exclusive Modular Plank Collection

MAXIPLANK

easyFIT

MaxiPlank – The future of flooring is not near...it's here!

MaxiPlank is a new innovation utilizing the best modular resilient plank technology.

The product is a wider and longer size plank which is very popular with timber style flooring and will create a feeling of large open spaces, whilst the six colour palette offers a diverse choice from Scandinavian inspired tones to natural Australian timbers.

MaxiPlank offers the following benefits:

- › The 5mm thick plank provides exceptional underfoot comfort as well as enhanced acoustic properties.
- › The 0.3mm PU wear layer with Dura Coat surface technology ensures that the product will be able to withstand even the harshest of residential environments. This is backed up by a 15 year residential manufacturer's warranty and 3 year light commercial warranty.
- › The modular 'drop lay' technology allows for planks to simply be 'dropped' into place with the use of a fast and easy to apply pressure sensitive adhesive. This installation process coupled with a fibreglass reinforced product core, makes MaxiPlank a leader in the market for stability.
- › The MaxiPlank range contains quality-recycled material and is a 100% recyclable product.
- › It is a FloorScore certified range, meaning that it has been tested and is in compliance with strict indoor air quality emission figures. This is particularly important for those suffering from allergies or respiratory problems.
- › Contains antibacterial and anti-fungal technology.
- › It can be installed directly onto or over most existing hard floors.*

* All subfloors must be prepared in accordance with Australian Standard AS1884-2012.

EasyFIT – innovative design made easy

EasyFIT is the premium Modular plank of its type on the Australian market. The product underwent many years of development and this has paid off with its success in both residential and commercial installations.

EasyFIT offers the following benefits:

- › The 5.0mm thick plank provides superior and supportive underfoot comfort and excellent acoustic properties.
- › The 0.5mm PU wear layer combined with the Dura Coat surface protection creates a product that will look great for an extended period. This is backed up by a 25 year residential and 7 year commercial manufacturer's warranty.
- › It contains a thick fibreglass reinforcement layer throughout the plank for superior stability.
- › Ease of installation, EasyFIT simply 'drops' into place using simple guidelines.
- › EasyFIT achieves in many cases the Building Code of Australia sound transfer requirements for multi-level dwellings without the use of an acoustic underlay.*
- › EasyFIT is suitable for most commercial applications.
- › FloorScore certified range meeting strict indoor air quality emissions, making for a safe and clean environment.
- › The EasyFIT range contains quality recycled material and is a 100% recyclable product.
- › The factory is committed to product stewardship where product is re-utilized at the end of its life-cycle.
- › Contains antibacterial and anti-fungal technology.
- › It can be installed directly onto or over most existing hard floors.*

*Please check with your local Andersens store regarding the sound requirements for multi-level dwellings as this varies depending on a number of factors.

*All subfloors must be prepared in accordance with Australian Standard AS1884:2012.

easyFIT

With EasyFIT technology, luxury vinyl flooring just got a whole lot simpler. More than just technology, the Andersens design team have researched the timber colours, patterns and grains that Australians love to see in their homes and especially on their floors.

The eight palette range faithfully reproduces the essence of the finest of local and international timbers. Aspen Wood from Colorado, Hickory from Canada plus the iconic timbers of Blackbutt and Spotted Gum from Australia.
