

KENECT

ADVANCED HYBRID FLOORING

CARPET COURT

Sorrento Oak

Kenect is a multi-layered, water resistant floor which combines the most advanced hybrid core technology with the best features of Luxury Vinyl Planks.

The core of Kenect is constructed using limestone calcium, bonded with polyvinyl chloride (PVC). This ensures the product is both dimensionally and structurally stable.

The secondary manufacturing process, Automated Hot Press (AHP), binds it all together with 2 LVT layers.

The benefits of this process are:

The top LVT layer delivers a more realistic and tactile surface finish.

The additional stability LVT layer makes the floor softer and quieter and more stable.

Vienna Oak

Low Maintenance

Kenect is simple to maintain, never requires sanding.

Easy Installation

Apart from its strength, Kenect installation method allows planks to be quickly installed. No adhesives are required and can be laid over existing timber or ceramic tiled floors.*

*Please refer to installation and maintenance guide.

*Product colours are depicted within the limitations of the printing process. Actual product should be viewed prior to final selection.

Water Resistant

Kenect planks are impervious to water, unlike most Laminates, it will not swell, even if fully submerged.

Durable

It's Aloxplus protection layer, combined with a heavy-duty wear layer, that makes Kenect a highly durable product and the ideal flooring solution for a modern lifestyle.

Phthalate Free

Kenect is Phthalate free making it a safe flooring for the whole family to walk and play on.

Contemporary Design

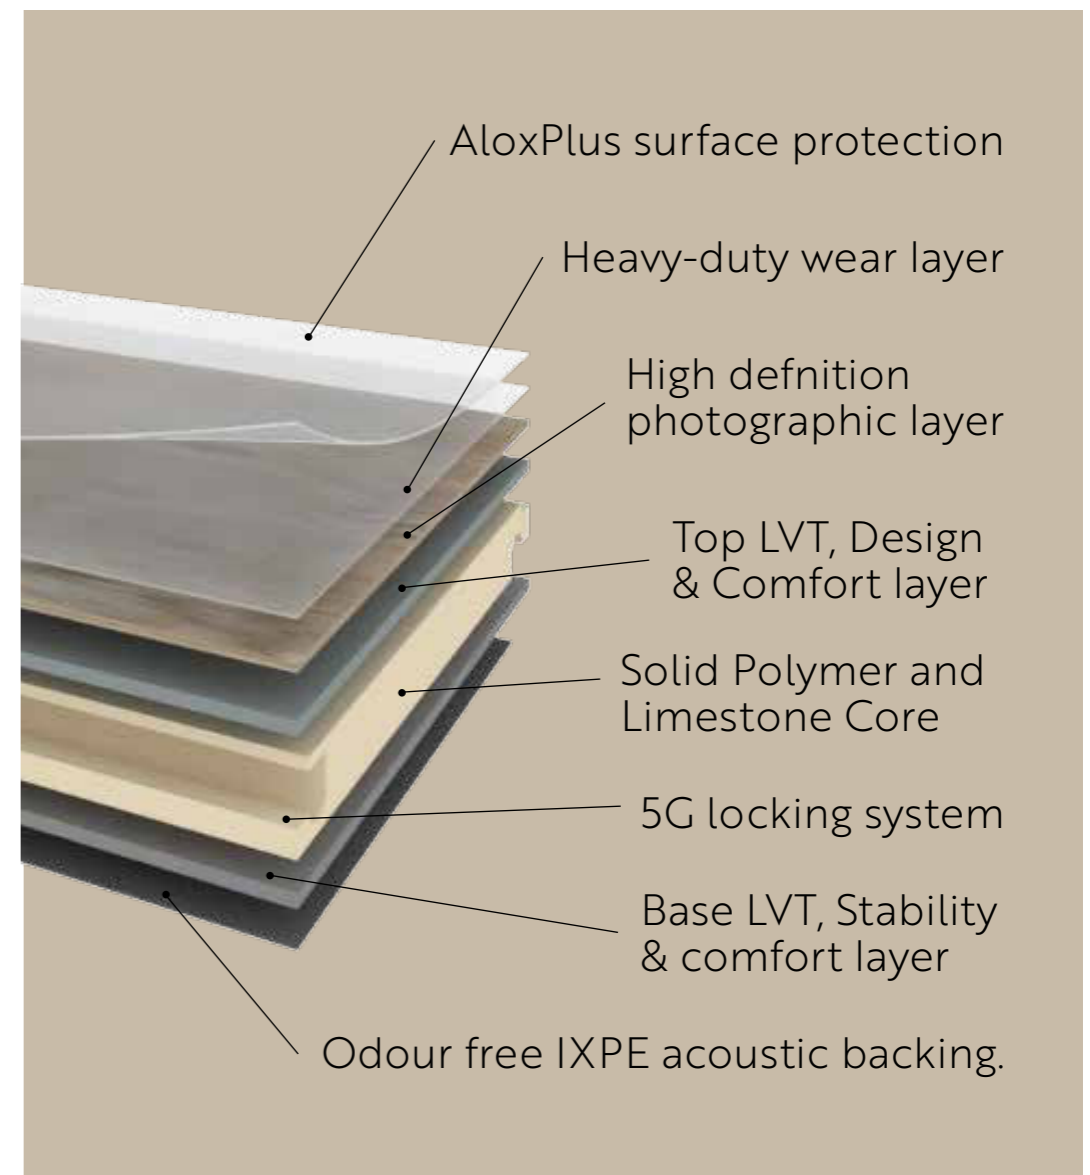

The Kenect range replicates some of the world's most beautiful timbers. Its advanced technology delivers the realism that creates such visual appeal.

Comfort Underfoot

The 1.5mm odour free IXPE acoustic backing, combined with the LVT comfort layer, significantly reduces noise transfer, making the planks quieter and more comfortable to walk on.
